Opioid Treatment Program

High Point's Opioid Treatment Program provides our clients with a supportive and encouraging recovery environment. Services include

- Information and access to medication assisted treatments, including methadone, buprenorphine (Suboxone), and naltrexone (Vivitrol) for opioid dependence
- Access to mental health services
- Individualized treatment plans
- Individual and group sessions
- Psycho-educational groups, including relapse prevention, health and wellness, and domestic violence education
- HIV/AIDS education and referral services
- Tobacco education and smoking cessation
- Opportunity for family involvement
- Linkage to self-help groups
- Assistance in addressing legal issues
- Connection to multi-service referrals
- Case management services

PAYMENT OPTIONS:

Celticare/Centpatico, ConnectorCare/NHP/BMC, Common Health, Commonwealth Care Alliance, MassHealth Careplus, MassHealth Standard, MBHP, and Medicare only with Medicaid. Clients can also self-pay.
